

Brentwood Elementary School Parents Advisory Council

The Board of Education is committed to engaging with its communities to develop the 2022-2027 Strategic Plan for Saanich Schools. The Board has narrowed its focus to the following three areas to improve student success in Saanich Schools.

- Literacy
- Indigenous Learner Success
- Mental Health and Wellness

Approximately 13% of Canadians face food insecurities, with children disproportionately represented. The PAC believes that food insecurity and hunger should be addressed for students to be successful within these initiatives. We encourage all families to engage with the strategic plan survey listed below to ensure our concerns and voice are reflected within the plan and, resultingly, the budget. Similarly, we encourage families to engage in the survey about additional areas of student improvement that you would like the Board to consider in their planning.
