

Math Review

20

Name _____

Day 1

Name _____
Date _____

1. My job is to count by 5's to complete the number sequence.

$$5 \quad \underline{\hspace{1cm}} \quad 15 \quad \underline{\hspace{1cm}} \quad 25$$

I can find the missing numbers by looking at the number before and after.

3. My job is to solve the addition problem by picking a strategy.

$$\begin{array}{r} 11 \\ + 2 \\ \hline \end{array}$$

I can find how many in all by _____.

2. My job is to solve the subtraction problem by picking a strategy.

$$\begin{array}{r} 10 \\ - 2 \\ \hline \end{array}$$

I can find how many are left by _____.

4. My job is to circle the number that is less than.

$$\begin{array}{r} 15 \\ 10 \end{array}$$

I can find the number that is less than by counting in order on the number line.

Day 2

1. My job is to count by 5's to complete the number sequence.

$$\begin{array}{r} 35 \\ 45 \\ \underline{\quad} \\ 55 \end{array}$$

I can find the missing numbers by looking at the number before and after.

3. My job is to solve the addition problem by picking a strategy.

$$\begin{array}{r} 12 \\ + 3 \\ \underline{\quad} \end{array}$$

I can find how many in all by _____.

Name _____

Date _____

2. My job is to solve the subtraction problem by picking a strategy.

$$\begin{array}{r} 7 \\ - 6 \\ \underline{\quad} \end{array}$$

I can find how many are left by _____.

4. My job is to circle the number that is less than.

$$\begin{array}{r} 20 \\ 16 \end{array}$$

I can find the number that is less than by counting in order on the number line.

Day 3

Name _____
Date _____

1. My job is to count by 5's to complete the number sequence.

$$85 \quad \underline{\hspace{1cm}} \quad 95 \quad \underline{\hspace{1cm}} \quad 105$$

I can find the missing numbers by looking at the number before and after.

3. My job is to solve the addition problem by picking a strategy.

$$\begin{array}{r} 4 \\ + 9 \\ \hline \end{array}$$

I can find how many in all by _____.

2. My job is to solve the subtraction problem by picking a strategy.

$$\begin{array}{r} 5 \\ - 1 \\ \hline \end{array}$$

I can find how many are left by _____.

4. My job is to circle the number that is less than.

11 17

I can find the number that is less than by counting in order on the number line.

Day 4

Name _____
Date _____

1. My job is to count by 5's to complete the number sequence.

$$40 \quad \underline{\hspace{1cm}} \quad 50 \quad \underline{\hspace{1cm}} \quad 60$$

I can find the missing numbers by looking at the number before and after.

2. My job is to solve the subtraction problem by picking a strategy.

$$\begin{array}{r} 9 \\ - 3 \\ \hline \end{array}$$

I can find how many are left by _____.

3. My job is to solve the addition problem by picking a strategy.

$$\begin{array}{r} 8 \\ + 8 \\ \hline \end{array}$$

I can find how many in all by _____.

4. My job is to circle the number that is less than.

5 2

I can find the number that is less than by counting in order on the number line.

Name _____
Date _____

1. My job is to count by 5's to complete the number sequence.

$$65 \quad \underline{\hspace{2cm}} \quad 75 \quad \underline{\hspace{2cm}} \quad 85$$

I can find the missing numbers by looking at the number before and after.

2. My job is to solve the subtraction problem by picking a strategy.

$$\begin{array}{r} 8 \\ - 4 \\ \hline \end{array}$$

I can find how many are left by _____.

3. My job is to solve the addition problem by picking a strategy.

$$\begin{array}{r} 13 \\ + 1 \\ \hline \end{array}$$

I can find how many in all by _____.

4. My job is to circle the number that is less than.

9 12

I can find the number that is less than by counting in order on the number line.

Day 6

Name _____
Date _____

1. My job is to count by 5's to complete the number sequence.

$$75 \quad \underline{\quad} \quad 85 \quad \underline{\quad} \quad 95$$

I can find the missing numbers by looking at the number before and after.

3. My job is to solve the addition problem by picking a strategy.

$$\begin{array}{r} 0 \\ + 7 \\ \hline \end{array}$$

I can find how many in all by _____.

2. My job is to solve the subtraction problem by picking a strategy.

$$\begin{array}{r} 4 \\ - 4 \\ \hline \end{array}$$

I can find how many are left by _____.

4. My job is to circle the number that is less than.

$$\begin{array}{r} 19 \\ 18 \end{array}$$

I can find the number that is less than by counting in order on the number line.

Day 7

Name _____
Date _____

1. My job is to count by 5's to complete the number sequence.

$$80 \quad \underline{\hspace{1cm}} \quad 90 \quad \underline{\hspace{1cm}} \quad 100$$

I can find the missing numbers by looking at the number before and after.

3. My job is to solve the addition problem by picking a strategy.

$$\begin{array}{r} 9 \\ + 6 \\ \hline \end{array}$$

I can find how many in all by _____.

2. My job is to solve the subtraction problem by picking a strategy.

$$\begin{array}{r} 10 \\ - 6 \\ \hline \end{array}$$

I can find how many are left by _____.

4. My job is to circle the number that is less than.

$$\begin{array}{r} 13 \\ 17 \end{array}$$

I can find the number that is less than by counting in order on the number line.

Day 8

Name _____
Date _____

1. My job is to count by 5's to complete the number sequence.

$$15 \quad \underline{\quad} \quad 25 \quad \underline{\quad} \quad 35$$

I can find the missing numbers by looking at the number before and after.

2. My job is to solve the subtraction problem by picking a strategy.

$$\begin{array}{r} 6 \\ - 5 \\ \hline \end{array}$$

I can find how many are left by _____.

3. My job is to solve the addition problem by picking a strategy.

$$\begin{array}{r} 7 \\ + 7 \\ \hline \end{array}$$

I can find how many in all by _____.

4. My job is to circle the number that is less than.

$$\begin{array}{r} 16 \\ 14 \end{array}$$

I can find the number that is less than by counting in order on the number line.

Day 9

Name _____

Date _____

1. My job is to count by 5's to complete the number sequence.

$$\begin{array}{r} 35 \\ 45 \\ 55 \end{array}$$

I can find the missing numbers by looking at the number before and after.

3. My job is to solve the addition problem by picking a strategy.

$$\begin{array}{r} 7 \\ + 4 \\ \hline \end{array}$$

I can find how many in all by _____.

2. My job is to solve the subtraction problem by picking a strategy.

$$\begin{array}{r} 11 \\ - 2 \\ \hline \end{array}$$

I can find how many are left by _____.

4. My job is to circle the number that is less than.

$$\begin{array}{r} 11 \\ 13 \end{array}$$

I can find the number that is less than by counting in order on the number line.

Day 10

Name _____
Date _____

1. My job is to count by 5's to complete the number sequence.

$$55 \quad \underline{\hspace{1cm}} \quad 65 \quad \underline{\hspace{1cm}} \quad 75$$

I can find the missing numbers by looking at the number before and after.

2. My job is to solve the subtraction problem by picking a strategy.

$$\begin{array}{r} 5 \\ - 3 \\ \hline \end{array}$$

I can find how many are left by _____.

3. My job is to solve the addition problem by picking a strategy.

$$\begin{array}{r} 3 \\ + 9 \\ \hline \end{array}$$

I can find how many in all by _____.

4. My job is to circle the number that is less than.

$$14 \quad \cdot \quad 17$$

I can find the number that is less than by counting in order on the number line.
